SOMMAIRE

60th Forum in Immunology:

"Cytokine HIV regulation in macrophages and lymphocytes and in AIDS pathogenesis: from *in vitro* to *in vivo*" organized by L.J. MONTANER, G.M. SHEARER and J.L. VIRELIZIER, with the participation of ... 575

Editorial overview:

L.J. MONTANER: Understanding HIV1, cytokines and effective immunity: bridging the gap between cytokine regulation *in vitro* and *in vivo* 575

Part I

G. POLI, A.L. KINTER, E. VICENZI and A.S. FAUCI: Cytokine regulation of acute and chronic HIV infection *in vitro*: from cell lines to primary mononuclear cells 578

L.J. MONTANER and S. GORDON: Th2-mediated HIV1 virostatic state: macrophage-specific regulation *in vitro* 583

H. SCHUITEMAKER: IL4 and IL10 as potent inhibitors of HIV1 replication in macrophages *in vitro*: a role for cytokines in the *in vivo* virus host range? 588

Part II

D. EMILIE, R. FIOR, M.C. CREVON, M.C. MAILLOT, F. BOUE and P. GALANAUD: Cytokines from lymphoid organs of HIV-infected patients: production and rôle in the immune disequilibrium of the disease ... 595

C. GRAZIOSI, G. PANTALEO and A.S. FAUCI: Comparative analysis of constitutive cytokine expression in peripheral blood and lymph nodes of HIV-infected individuals 602

Part III

L. MEYAARD and F. MIEDEMA: Changes in cytokine release by CD4+ T cells in HIV1 infection 607

S. ROMAGNANI, E. MAGGI and G. Del PRETE: HIV can induce a T_H1 to T_H0 shift and preferentially replicates in CD4+ T-cell clones producing T_H2-type cytokines 611

A. VYAKARNAM: Mechanisms for an opposing role for Th1/2 cells in AIDS 618

Part IV

G.L. ADA and R.V. BLANDEN: CTL immunity and cytokine regulation in viral infection 625

P.L. SALK and J. SALK: Cell-mediated immunologic memory in prevention and treatment of HIV disease 629

M. CLERICI and G.M. SHEARER: Cellular immunity and a type 1 cytokine profile in protection against HIV infection and progression to AIDS 635

F. ERARD, P.R. DUNBAR and G. LE GROS: The IL4-induced switch of CD8+ T cells to a TH2 phenotype and its possible relationship to the onset of AIDS 643

Part V

J. ENNEN, S. NORLEY and R. KURTH: The activated CD8 T-lymphocyte-derived immunodeficiency-virus-suppressing lymphokine in African green monkeys: evidence for a role in control of infection? 647

D.J. BLACKBOURN, C. MACKEWICZ, E. BARKER and J.A. LEVY: Human CD8+ cell non-cytolytic anti-HIV activity mediated by a novel cytokine 653

Part VI

S. GESSANI, P. PUDDU, B. VARANO, P. BORGHI, L. CONTI, L. FANTUZZI, M. PAPACCHINI and F. BELARDELLI: Role of interferons in the restriction of HIV replication in human monocytes/macrophages 659

R.S. KORNBLUTH, H. MATSUZAKI, P.R.A. MEYLAN and D.D. RICHMAN: Interferon interactions with HIV1 in macrophages 664

CONTENTS (continued)

A.S. LAU, S.D. DER, J.D. MERRILL and M.C. YEUNG: Evasion of the interferon- α system in HIV infection	668
E. LAURET, V. VIEILLARD, V. ROUSSEAU, J. De MAEYER-GUIGNARD and E. De MAEYER: Exploring interferon- β for gene therapy of HIV infection	674
H.E. GENDELMAN, T. BALDWIN, L. BACA-REGEN, S. SWINDELLS, L. LOOMIS and S. SKURKOVICH: Regulation of HIV1 replication by interferon alpha: from laboratory bench to bedside	679
<i>Part VII</i>	
G. KAPLAN and A.L. MOREIRA: TNF α regulation of HIV1: biology and therapy	685
J.L. VIRELIZIER: How HIV may escape the activating effects of TNF	690
<i>Part VIII</i>	
B.E. TORBETT and D.E. MOSIER: Does preferential Th subset activation contribute to the murine acquired immunodeficiency disease (MAIDS)?	696
E. KHATISSIAN, L. CHAKRABARTI and B. HURTREL: Cytokine patterns in lymph nodes during the early stages of simian immunodeficiency virus infection	702
Y.J. ROSENBERG, M.G. LEWIS, F. VILLINGER and A.A. ANSARI: Cytokines and simian immunodeficiency virus infections	706
General discussion	714
J.L. VIRELIZIER: Overview of the Forum, and the future of research on cytokines and HIV pathogenesis; L.J. MONTANER and S. GORDON: Deciphering the Th2 conundrum in AIDS: a macrophage perspective; D.J. BLACKBOURN <i>et al.</i> : Th1/Th2 cytokines in AIDS: sorting out the confusion; A. VYAKARNAM: General comments on Th1/Th2 cytokines; S. ROMAGNANI, E. MAGGI and G. Del PRETE: HIV pathogenesis: Th2 shift, Th2 CD8 ⁺ T cells and CD30; P.L. SALK and J. SALK: Overview of cytokine climate, CD8 T cells and therapies in AIDS; S. GESSANI <i>et al.</i> : The role of IL10 and macrophages in HIV1 infection, and production of interferons in HIV1-infected monocytes/macrophages; G. POLI <i>et al.</i> : Comments on cell systems, interferon- γ and HIV1; R.S. KORNBLUTH <i>et al.</i> : Role of cytokines in AIDS: still a challenge; E. KHATISSIAN <i>et al.</i> : Role of cytokines in AIDS: turning to animal models.	
<i>Instructions to Authors</i>	725
